/ 550.6 G4
v.45 pt.1

CONTENTS

	Page
Structure and stratigraphy of southern Quebec; by T. H. Clark	1
Stratigraphic problems in the upper Mississippi Valley; by Arthur C. Trowbridge and Gordon I. Atwater	21
Silurian sections near Mount Union, central Pennsylvania; by Frank McKim Swartz	81
Evidence from drumlins concerning the glacial history of Boston Basin; by Irving B. Crosby	135
Yardangs; by Eliot Blackwelder	159
Geologic problems of the Beartooth-Bighorn region; by W. H. Bucher, W. T. Thom, Jr., and R. T. Chamberlin	167
Contraction phenomena in cherts; by N. L. Taliaferro	189
Cayuga Valley Lake history; by Herman L. Fairchild	233
Origin of Georges Bank; by F. P. Shepard, J. M. Trefethen, and G. V. Cohee	281
Granites of the Front Range—The Longs Peak-St. Vrain Batholith; by Margaret Fuller Boos and C. Maynard Boos	303
Seine-Coutchiching problem; by Phillip L. Merritt	333
Origin and nature of ore deposits—an historical study; by Frank Dawson Adams	375
Lower Devonian flora from Beartooth Butte, Wyoming; by Erling Dorf	425
Glacial marginal shores and the marine limit in Massachusetts; by Irving B. Crosby and Richard J. Lougee	441
Dissected pediments in the Magdalena district, New Mexico; by A. H. Koschmann and G. F. Loughlin	463
Conglomerate of Abram Lake, Ontario, and its extensions; by F. J. Pettijohn	479
Eocene marine algae (Lithothamnieae) from the Sierra Blanca limestone; by Marshall A. Howe	507
Upper Mississippi Valley structure; by A. C. Trowbridge	519
Volcanoes of Kamchatka; by N. Krijanovsky	529
Origin of the Colorado River; by Eliot Blackwelder	551
Sierra Maestra of Cuba, part of the northern rim of the Bartlett Trough; by Stephen Taber	567
Structural study of the Snowbank Stock; by Robert Balk and Frank F. Grout	621
Unity of physiographic history in southwest Norway; by George David Hubbard	637
Distribution of the Wisconsin Glacier in the Delaware Valley; by Freeman Ward	655
Wind River Basin; by C. Max Bauer	665
Permian stratigraphy of trans-Pecos Texas; by Philip B. King	697
Chelonechinus n. g., a Neogene Urechinid; by F. A. Bather	799
Neogene Cirripede (*Verruca*) from Viti Levu, Fiji; by Thomas H. Withers	875
Internal structures in the Boulder Batholith; by Frank F. Grout and Robert Balk	877
Early Chemung shore line in Pennsylvania; by Bradford Willard	897
Correlation chart of geologic formations of North America; by Hervey W. Shimer	909

Page

Correlation and interpretation of Paleozoic stratigraphy in south-central Idaho; by Clyde P. Ross 937
Reverse faulting in the Sawatch Range; by J. T. Stark 1001
Cylindrical structures in sandstones; by J. E. Hawley and R. C. Hart 1017
Earthquake region of Taofu; by Arnold Heim 1035
Skull and dentition of the American Miocene cat, *Pseudælurus;* by Chester Stock 1051
The Eparchean peneplain—an exploitation of the doctrine of isostasy; by Andrew C. Lawson 1059
Seneca Valley physiographic and glacial history; by H. L. Fairchild 1073
Age of the Midway group; by Gayle Scott 1111

ILLUSTRATIONS

PLATES

		Facing page
Plate 1—BLACKWELDER:	Group of sharp yardang ridges separated by troughs	159
" 2— "	Yardang trough	160
" 3— "	Side of a large yardang ridge with miniature canyons carved by occasional rain rills	161
" 4— "	(A) Steep undercut side of a long, ragged yardang at the edge of the playa	162
	(B) Yardang, five feet high, strongly scoured and moulded by sandblast	162
" 5— "	Several yardang ridges separated by U-shaped troughs	163
" 6— "	Overhanging prow of a six-foot yardang as seen from the side	164
" 7— "	Isolated hills believed to be yardangs in a more advanced stage of wastage	165
" 8—BUCHER, THOM, AND CHAMBERLIN:	(A) Canyon of Clark Fork, Wyoming	174
	(B) Rattlesnake Mountain, Wyoming	174
" 9— " " " "	Overthrust and anticline, south of Livingston, Montana	175
" 10— " " " "	(A) Heart Mountain. Wyoming	176
	(B) Limestone Butte, Montana, from the south	176
" 11—TALIAFERRO:	Map of Central California	192
" 12— "	Monterey cherts and porcelanites overlain by thick terrace deposits	193
" 13— "	(A) Thin bedded Monterey cherts with massive bed of white porcelanite	194
	(B) Spheroids in bedded Monterey chert and porcelanite	194
" 14— "	(A) Group of compound spheroids	195
	(B) Spheroids in diatomite, Huerhuero district	195
" 15— "	(A) Bed of closely packed spheroids	198
	(B) Large contraction sphere (a foot in diameter) in a thick bed of porcelanite	198
" 16— "	(A) Large contraction spheres in massive chert, Drakes Bay, California	199
	(B) Contraction spheroid in pure chert	199
" 17— "	(A) Photomicrograph (x 7) of a part of a contraction spheroid in calcareous opaline porcelanite	202
	(B) Photomicrograph (x 10) of a part of the spheroid shown in Plate 20, B	202

		Facing page
Plate 18—Taliaferro:	(A) Photomicrograph (x 10) of part of a spheroid in Franciscan chert	203
	(B) Contraction spheroids in pure, white Monterey chert	203
" 19— "	(A) Simple contraction spheroid in calcareous opaline porcelanite	206
	(B) Compound or "double-eyed" spheroid	206
" 20— "	(A) Contraction spheroid in faintly banded calcareous opaline porcelanite	207
	(B) Large discrete contraction spheroid	207
" 21— "	(A) Photomicrograph (x 12) of a part of a spheroid in rather pure chert	208
	(B) Photomicrograph (x 10) of a part of a spheroid	208
" 22— "	(A) Photomicrograph (x 10) of a part of a spheroid in lacustrine chert	209
	(B) Greatly flattened spheroid in calcareous porcelanite	209
" 23— "	Photomicrographs (x 100) of a rather pure chert, stained brown with organic matter	212
" 24— "	Miscellaneous spheroids	213
" 25—Boos and Boos:	(A) The St. Vrain region	303
	(B) Horseshoe Valley and the Mummy Mountains	303
" 26— " " "	(A) Summit of Hallets Peak	314
	(B) Otis Peak above Andrews Lake	314
" 27— " " "	(A) Glacier Gorge	315
	(B) Longs Peak granite	315
" 28— " " "	Longs Peak from the outlet of Chasm Lake	316
" 29— " " "	(A) Detail of chasm wall on Longs Peak	317
	(B) Estes Park	317
" 30— " " "	(A) Longs Peak granite	322
	(B) Mount Olympus granite	322
" 31— " " "	(A) Myrmekite growth at the border of a microcline crystal	323
	(B) Thin section of Mount Olympus granite	323
	(C) Thin section of Longs Peak granite	323
" 32— " " "	(A) Nonmagnetic assemblage of typical Longs Peak granite	328
	(B) Magnetic assemblage of typical Longs Peak granite	328
	(C) Nonmagnetic assemblage of typical Mount Olympus granite	328
	(D) Magnetic assemblage of typical Mount Olympus granite	328
" 33— " " "	(A) Nonmagnetic heavy minerals from Longs Peak granite	329
	(B) Heavy minerals from Mount Olympus granite	329

		Facing page
Plate 34—Merritt:	Crooked Pine Lake	333
" 35— "	(A) Ellipsoidal structure	344
	(B) Lower Seine conglomerate	344
" 36— "	(A) Steeply dipping Seine sediments	345
	(B) Upper Seine conglomerate	345
" 37— "	Seine-Keewatin contact	356
" 38— "	Seine conglomerate	357
" 39— "	(A) Sediments injected lit-par-lit	366
	(B) Keewatin-Seine series	366
" 40— "	Seine sediments	367
" 41—Adams:	Illustrations in early works on ore deposits	388
" 42—Dorf:	Lower Devonian flora	428
" 43— "	Lower Devonian flora	429
" 44—Koschmann and Loughlin:	Panorama of the Magdalena Range	463
" 45— " " "	Magdalena Range from Kelly	474
" 46— " " "	Upper Patterson Canyon	475
" 47—Pettijohn:	Sioux Lookout region from the air	484
" 48— "	Normal conglomerate at Little Vermilion Lake	485
" 49— "	Conglomerates and slates	492
" 50— "	Abram Lake schist and conglomerate	493
" 51— "	Minnitaki Lake Area	504
" 52—Howe:	Fossil algae of the Sierra Blanca limestone	518
" 53— "	*Mesophyllum schenckii* Howe	518
" 54— "	*Archaeolithothamnium keenani* Howe	518
" 55— "	*Lithothamnium laminosum* Howe	518
" 56— "	*Lithophyllum sierrae blancae* Howe	518
" 57—Taber:	View of Santiago Bay with its meandering channel from an elevation of 1,500 meters	567
" 58— "	Sketch map of Oriente Province showing location of geologic formations in the Sierra Maestra region	569
" 59— "	Topographic map of the Cabo Cruz Peninsula	569
" 60— "	Aerial view of Puerto Pelado fault scarp	572
" 61— "	Old erosion surface north and west of Santiago Bay	573
" 62— "	Aerial view of Sierra de Boniato fault scarp	576
" 63— "	(A) Scarp of the Loma de Santa Maria de Loreta	577
	(B) Mountains carved from basal complex	577
" 64— "	(A) Peneplain near Media Luna	582
	(B) Andesite flow resting on coarse andesitic breccia	582
" 65— "	(A) Crumpled beds of the San Luis formation	583
	(B) Contact of Farallon Grande breccia with older stratified rocks	583
" 66— "	Contorted mass of stratified tuff in Farallon Grande breccia	586
" 67— "	(A) Cloud-draped Pico Turquino, the highest mountain in Cuba	587
	(B) Composite aerial view of the Cuchillas of eastern Cuba	587
" 68— "	Aerial view of terraces at Punta Caleta	588
" 69— "	Aerial view of Baitiquirí Bay and coastal hills	589

Facing page

Plate 70—TABER: Youthful gorge cut across terraces surfaced with the coastal limestone 592
" 71— " (A) Mountain range east of Rio Bacanao 593
(B) Aerial view of terraces east of Punta Escalereta 593
" 72— " Aerial view of peneplain and marine terraces near Cabo Cruz 594
" 73— " Ensenada de Mora, the Pilón Plain, and the west end of the Turquino Range 595
" 74— " Aerial view of Pilón Plain 598
" 75— " Aerial view of Gran Piedra Range looking N. 60° W. 599
" 76— " (A) Terraces of Punta Escalereta as viewed from the sea .. 600
(B) Gorge of the Rio San Juan at its mouth 600
" 77— " (A) Fault surface at the Lola Mine near Vinent 601
(B) Normal fault in La Cruz marl 601
" 78— " Aerial view of the coastal hills and Gran Piedra Range west of Santiago Bay 606
" 79— " Aerial view of the gorge of the Rio San Juan 607
" 80— " Puerto Nima Nima 612
" 81— " Sierra de Boniato fault scarp 613
" 82— " (A) Aerial view of fault splinter, Sierra de Boniato scarp .. 614
(B) Aerial view of terraces near Baitiquirí 614
" 83— " (A) Aerial view of terraces near Punta Maisí 615
(B) Coastal hills between the Sabanalamar and the Imias rivers 615
" 84— " Aerial view of coastal hill between the Yacabo Abajo and the Imias rivers 618
" 85— " Aerial view of old terraces east of the Rio Imias 619
" 86—BALK AND GROUT: Hand specimens of Snowbank syenite 621
" 87— " " " Snowbank lamprophyre dike and syenite inclusion 630
" 88— " " " Conglomerate and aplites at Snowbank Lake .. 631
" 89—HUBBARD: Norwegian gorges 637

PUBLICATIONS OF THE GEOLOGICAL SOCIETY OF AMERICA

Regular Publications

The Society issues annually, in six parts, a single serial octavo publication entitled Bulletin of the Geological Society of America, the edition being 1,500 copies. A small supply of authors' separates is kept for sale by the Secretary at the prices quoted in each volume.

The Bulletin is sold at the uniform price of ten dollars ($10.00) per volume, with a discount of twenty-five (25) per cent to Fellows of the Society. A discount of ten (10) per cent is allowed to persons residing elsewhere than in North America and to public and institutional libraries; carriage, extra. Subscriptions are payable in advance. Regular subscribers within the United States of America and its possessions receive their parts, postage paid, as issued. Forty (40) cents per volume must be added to the subscription price to cover postage to other countries in the Postal Union.

The price of the index to volumes 1–10 is $2.25; to volumes 11–20, $3.50; to volumes 21–30, $4.00; to volumes 31–40, $4.00; carriage, extra. No reduction is made to dealers. Orders should be addressed to the Secretary, whose address is 419 West 117th Street, New York, N. Y., and drafts and money orders should be made payable to *The Geological Society of America*.

Description of the Published Volumes

Volumes*	Pages	Plates	Figures
Vol. 1, 1889	593 + xii	13	51
Vol. 2, 1890	622 + xiv	23	63
Vol. 3, 1891	541 + xi	17	72
Vol. 4, 1892	458 + xi	10	55
Vol. 5, 1893	655 + xii	21	43
Vol. 6, 1894	528 + x	27	40
Vol. 7, 1895	558 + x	24	61
Vol. 8, 1896	446 + x	51	29
Vol. 9, 1897	460 + x	29	49
Vol. 10, 1898	534 + xii	54	83
Index to volumes 1–10	209	..	..
Vol. 11, 1899	651 + xii	58	37
Vol. 12, 1900	538 + xii	45	28
Vol. 13, 1901	583 + xii	58	47
Vol. 14, 1902	609 + xii	65	43
Vol. 15, 1903	636 + x	59	16
Vol. 16, 1904	636 + xii	94	74
Vol. 17, 1905	785 + xiv	84	96
Vol. 18, 1906	717 + xii	74	59
Vol. 19, 1907	617 + x	41	31
Vol. 20, 1908	749 + xiv	111	35

* Dates for volumes 1–44 are those of the annual meeting, the proceedings of which appear therein; e. g., volume 1, 1889, printed in 1890, contains proceedings of the annual meeting of 1889. Beginning with the annual meeting of 1933, proceedings appear as a separate publication, and the annual volume of the Bulletin bears its proper year designation; e. g., volume 45, 1934.

Irregular Publications

Each author receives 50 copies without cost, and is permitted to order any additional number at a slight advance on cost of paper and presswork. These reprints are identical with those of the editions issued and distributed by the Society, but the cover bears only the title of the paper, the author's name, and the statement, "Reprinted from the Bulletin of the Geological Society of America, vol. —, p. —, pl. — (Date)."

CORRECTIONS AND EMENDATIONS

Contributors to volume 45 have been invited to send corrections and emendations to be made in their paper, and the volume has been scanned with some care. Corrections and insertions are as follows:

Page 429, plate 43, figures 13, 14, *for* "*Broggeria*" *read* "*Brōggeria.*"
" 431, line 9 from bottom, *for* "*Bucheria Ovata*" *read* "*Bucheria ovata.*"
" 530, lines 21, 29, from top, *for* "P. T. Novograblonov" *read* "P. T. Novograblenov."
" 538, No. 49, last line, *for* "Koryan" *read* "Koryak."
" 607, plate 79, *for* "left" *read* "right."
" 614, plate 82–A, *for* "60" *read* "62."
" 626, line 5 from bottom, *for* "Fig. 1" *read* "Fig. 2."
" 637, line 11 from top, *for* "skerry-fence" *read* "skerry-gard." Author wishes the substitution to be made throughout the article.
" 642, plate 90 B, *for* "ice-cam" *read* "ice-cap."
" 695, plate 102 B, *for* "left" *read* "right."
" 714, figure 2, section B, *for* "Permian" *read* "pre-Permian."
" 934, plate 122, Eocene 15, *for* "Soldado fm." *read* "Boca de Serpiente."
" 471, line 9 from bottom, *for* "pediments" *read* "pediment."
